Ref: TARPL/INTERN/BLR/FY26/LMS-2

Date: August 1 2026

Dear Mr. Suyash S,

Company Overview

Founded in 2007 and headquartered in Bengaluru, the aerospace hub of the Indian subcontinent, Thaejus Aerodyne Research Pvt. Ltd. operates at the forefront of the Unmanned Aerial Systems ecosystem. We serve government agencies and corporate entities with specialist solutions across Management, Operations and Technical verticals, supporting mission-critical objectives and helping shape the future of the UAS industry.

We are more than a logo or a name. Our brand reflects the standards for which we are recognised, the trust our clients place in us and the pride with which we say, “We are Team Thaejus.” Interning with us offers the opportunity to contribute within a collaborative aerospace and education-technology environment. Great journeys begin here with us.

Offer of Internship

We are pleased to offer you a six-month engagement as Cybersecurity & Artificial Intelligence Intern – LMS Development in our Aviation Training Division, reporting to Mr. Tarun. S, Head of IT, who will supervise your work, review deliverables and provide day-to-day guidance.

Your internship is expected to commence on 1st August 2026 and continue through 1st March 2027, unless officially extended or concluded earlier in accordance with this letter. This internship is intended to provide structured practical exposure and does not constitute an offer or guarantee of permanent employment.

Role Overview

As a Cybersecurity and Artificial Intelligence Intern, you will contribute to the planning, design, development, testing and deployment of a secure and scalable Learning Management System (LMS). The internship will provide practical exposure to full-stack software development, database management, artificial intelligence, cybersecurity, system security, testing, deployment and documentation.

The project objective is to develop and deploy a secure and user-friendly LMS platform for managing courses, learning materials, assessments, users, progress tracking and related educational activities, while evaluating and integrating appropriate AI-enabled features. Scope, priorities, technology choices and production readiness will remain subject to approval by your reporting manager and authorized Company stakeholders.

Place of Work

Your place of posting will be Bengaluru (Bangalore). The internship may include remote or hybrid work when approved by your reporting manager. Should the need arise, you may be required to attend or travel to another Company location with reasonable prior notice.

Working Hours and Review Cycle

You will follow a flexible schedule and may organize your work according to convenience, while contributing approximately 15 hours per week and meeting all agreed milestones. You must coordinate your weekly schedule, priorities, deliverables and delivery dates with your reporting manager in advance.

You are expected to connect with your reporting manager every Friday evening, and other mutually agreed times, to present the week's work, review progress and confirm the next set of deliverables. Review comments will ordinarily be provided within two

days. Required corrections must be incorporated within the mutually agreed timeline before a deliverable is treated as completed and signed off.

Key Responsibilities

- Analyze functional, technical and security requirements and contribute to LMS planning and architecture.
- Design and develop responsive frontend and backend components of the application.
- Design, implement and maintain databases for users, courses, assessments, learning materials, enrolments and progress information.
- Implement authentication, authorization, secure session management, role-based access control and secure user administration.
- Apply cybersecurity principles and secure-by-design practices throughout the software development lifecycle.
- Identify and mitigate common web-application risks, including authentication weaknesses, injection attacks, insecure access control, security misconfiguration and sensitive-data exposure.
- Apply secure coding standards; conduct code review, vulnerability assessment and security testing under authorized conditions.
- Explore and integrate approved AI features such as personalized learning, content recommendations, automated assistance and learning analytics.
- Develop and document APIs and integrate approved third-party services where required.
- Perform unit, functional, integration, regression, usability and security testing.
- Use Git/GitHub or another approved version-control platform and follow collaborative development practices.
- Document system architecture, technical decisions, APIs, data models, security controls, test results and deployment procedures.
- Assist with authorized deployment, configuration, monitoring, troubleshooting and maintenance.
- Evaluate performance, reliability, accessibility, scalability and security, and recommend improvements.
- Research relevant emerging technologies and present evidence-based recommendations to the reporting manager.

Cybersecurity and Acceptable-Use Requirements

- Perform security testing only on Company-approved systems, environments, repositories and accounts, and only within the written or clearly assigned scope.
- Do not access, scan, test, exploit, copy or disclose any third-party system, account, dataset or service without express written authorization.
- Use only approved test data. Real personal, customer, employee or learner data must not be placed in development or AI tools unless specifically authorized and protected.
- Do not enter Company source code, credentials, personal data, confidential material or proprietary information into public or unapproved AI services.
- Keep passwords, API keys, tokens, certificates and other secrets in approved secret-management or environment-configuration systems; never commit them to source control.
- Promptly report suspected vulnerabilities, data exposure, credential compromise, malware, unauthorized access or other security incidents to the reporting manager.
- Follow least-privilege access, secure backup, logging, dependency-management and change-control practices prescribed by the Company.
- Do not deploy to a production environment, publish a repository, release software or enable an external integration without prior approval.

Qualifications and Skill Set

- Pursuing or having completed a degree or recognized programme in Computer Science, Information Technology, Cybersecurity, Artificial Intelligence, Software Engineering or a related discipline.
- Basic knowledge of Python, JavaScript or a comparable programming language.
- Understanding of HTML, CSS, PHP and frontend-development concepts.
- Basic knowledge of relational databases and SQL.
- Familiarity with REST APIs and client-server architecture.
- Understanding of cybersecurity fundamentals and common web-application risks.
- Familiarity with Git/GitHub and collaborative version control.
- Basic understanding of AI and machine-learning concepts.
- Problem-solving, debugging, documentation and communication skills.
- Willingness to learn new technologies and follow secure-development procedures.

Key Technical Areas

Software Development

- Frontend and backend development
- REST APIs and third-party integrations
- Database design and management
- Software architecture
- Git and version control
- Testing, debugging and technical documentation

Cybersecurity

- Secure software development
- Authentication and authorisation
- Role-Based Access Control (RBAC)
- Web-application and API security
- Vulnerability identification and remediation
- Security testing
- Data protection and privacy
- Logging, monitoring and incident reporting

Artificial Intelligence

- Machine-learning concepts
- AI-assisted educational features
- Recommendation and personalisation systems
- Natural Language Processing, where applicable
- AI-powered learning assistance
- Data analysis and learning analytics
- Responsible AI, privacy and human oversight

Deployment and Infrastructure

- Application deployment
- Cloud technologies, where applicable
- CI/CD concepts
- Configuration and environment management
- System monitoring and troubleshooting
- Backup, recovery and operational security

Indicative Internship Phases and Deliverables

Period	Focus	Indicative deliverables
Month 1	Discovery and secure architecture	Requirements register, approved technology stack, system/data-flow diagrams, threat model, project plan and development environment.
Month 2	Core LMS foundation	User, role, course and content modules; database schema; API foundation; repository standards and initial test suite.
Month 3	Assessments and progress	Assessment workflows, progress tracking, dashboards, validation, audit logging and RBAC review.
Month 4	Security hardening	Security controls, vulnerability review, remediation log, dependency review, privacy controls and security-test evidence.
Month 5	Approved AI features	Prototype or integration of approved AI-assisted learning, recommendation, support or analytics features with safeguards and evaluation notes.
Month 6	Integration and handover	End-to-end testing, performance review, deployment package, administrator/developer documentation, demonstration and knowledge transfer.

Deliverables are indicative and may be revised by mutual agreement based on project priorities, technical feasibility, security findings, available infrastructure and stakeholder feedback.

Expected Learning Outcomes

Subject to active participation and satisfactory completion of assigned work, the internship is intended to provide practical experience in:

- Developing and deploying a real-world LMS application.
- Applying cybersecurity principles to a production-oriented software system.
- Designing secure authentication, authorization and RBAC mechanisms.
- Developing, documenting and consuming APIs.
- Working with databases, backend services and frontend interfaces.
- Applying AI/ML concepts to appropriate educational use cases.
- Conducting functional, integration and security testing.
- Using professional development, documentation and version-control practices.
- Understanding the software development lifecycle from requirements and design through development, testing, deployment and maintenance.
- Working with stakeholders to understand requirements and deliver technical solutions.

Performance, Supervision and Sign-Off

Your performance will be assessed against participation, professional conduct, secure working practices, quality of deliverables, documentation, collaboration, responsiveness to review feedback and completion of agreed milestones. A weekly submission is complete only after it is reviewed and signed off by the reporting manager. All material changes to scope, architecture, external services, data handling or deployment must be approved before implementation.

Notice and Termination

- a) Your internship engagement is at will. Either you or Thaejus Aerodyne Research Pvt. Ltd. may terminate the engagement at any time, with or without cause and, subject to applicable law, with or without notice.
- b) If your conduct constitutes a serious breach of Company standards, security requirements, confidentiality obligations or lawful instructions, the Company may terminate the internship immediately.
- c) This offer is issued on the understanding that all information provided by you during the selection process and before or at joining is true and complete. If any material information is found to be false, misleading or knowingly suppressed, the Company may withdraw this offer or terminate the internship without compensation, subject to applicable law.

Verification

- a) This offer and appointment are based on the information and supporting documents provided by you during the selection process and before or at joining.
- b) The offer is governed by Indian law and remains subject to satisfactory reference checks, validation of educational qualifications and any lawful background verification required by the Company.

Code of Ethics and Business Conduct

Adherence to Thaejus Aerodyne Research Pvt. Ltd.'s Code of Ethics and Business Conduct, information-security requirements and lawful Company policies is a condition of your internship. By accepting this offer, you agree to familiarize yourself with and comply with these requirements throughout the engagement.

Proprietary Information and Intellectual Property

During your internship, you may receive confidential, proprietary or trade-secret information belonging to Thaejus Aerodyne Research Pvt. Ltd. or to third parties to whom the Company owes a duty of confidence. All such information is referred to in this letter as "Proprietary Information."

Proprietary Information includes, without limitation:

- Software developed, owned or licensed by or for the Company, including source code, object code, models, algorithms, prompts, configurations, APIs, databases, schemas, test data, documentation, screens, workflows, designs, specifications, diagrams, bug reports, security findings and customer information.
- Cybersecurity information, including vulnerabilities, threat models, penetration-test results, incident records, access-control designs, credentials, keys, tokens, network or cloud configurations, logs and remediation plans.
- AI and data assets, including datasets, annotations, evaluation results, model configurations, training or inference workflows, analytical methods and AI-generated outputs created for Company work.
- Marketing and sales plans, product-development plans, creative collateral, training material, learning content, competitive analyses, business or financial plans, non-public financial information, agreements and customer or employee lists.
- Any other non-public information relating to the Company's inventions, technological developments, know-how, purchasing, accounting, merchandising, operations or licensing, or information the Company is legally obliged to keep confidential.

Proprietary Information does not include information that is lawfully in the public domain without breach of an obligation, or generic knowledge and skills independently acquired by you without using or disclosing the Company's Proprietary Information.

- a) During and after the internship, you will hold Proprietary Information in confidence and will not use, transfer, publish, disclose or report it, directly or indirectly, except to authorized Company personnel or authorized third parties when necessary to perform assigned duties, or as directed in writing by the Company.
- b) You confirm that you have not brought and will not use any confidential or proprietary information of a former employer, institution, client or other third party unless its use is lawfully authorized in writing.
- c) You will promptly disclose to the Company all ideas, processes, inventions, designs, code, models, documentation, modifications and improvements relating to assigned Company work that are conceived or created by you, alone or with others, during the internship ("Work Product").
- d) To the extent permitted by applicable law, Work Product created within the scope of the internship, using Company resources or Proprietary Information, or specifically commissioned as an internship deliverable shall belong exclusively to the Company. You agree to execute reasonable documents necessary to record or protect those rights without additional compensation, subject to applicable law.
- e) You must disclose any pre-existing code, library, model, dataset, asset or other intellectual property proposed for use in the LMS. No third-party or open-source component may be incorporated contrary to its license or without required approval and attribution.
- f) You will not undertake conflicting work or use Company time, systems, data or Proprietary Information for another business without prior written consent. You will not accept gifts, entertainment or favors that create or appear to create a conflict of interest.
- g) For twelve months after the internship ends, you will not solicit for employment any Company employee with whom you worked directly, to the extent such restriction is valid and enforceable under applicable law, without the Company's written consent.
- h) At the end of the internship or upon request, you will return Company property and permanently delete Company information from personal devices, accounts and storage, subject to any written retention direction. This includes documents, source code, repositories, credentials, datasets, learning content, media and copies in any form.
- i) You will be required to sign a separate Non-Disclosure and Proprietary Information Agreement. A breach of security, confidentiality or data-protection obligations may result in access suspension, termination and any other lawful action available to the Company.

Data Protection and Responsible AI

- Process personal data only for an assigned and authorized purpose, using the minimum data reasonably necessary.
- Follow applicable Indian law, Company privacy policies, retention requirements and stakeholder instructions.
- Use anonymized, synthetic or approved test data wherever practicable.
- Document material AI limitations, evaluation criteria, data sources, privacy risks, bias risks and human-review requirements.
- Do not represent experimental AI outputs as verified facts or make high-impact automated decisions without approved human oversight.
- Immediately report accidental disclosure, loss, unauthorized processing or suspected misuse of personal or confidential data.

Goodwill Offer

Upon satisfactory completion of the full internship term and successful sign-off of all committed deliverables, the Company shall, at its sole discretion, offer you a 6 Month Certification Course on Unmanned Aircraft Flight Operations. Upon successful completion of that course, the Company may issue a Certificate of Completion of the Thaejus Aerodyne Specialization Program.

After certification, the Company may, at its discretion and subject to organizational requirements, consider you for employment or provide placement assistance. Neither this clause nor successful completion of the internship creates a right or guarantee of certification, employment or placement.

This goodwill offer ceases if the internship is terminated before the stipulated end date or if required deliverables are not satisfactorily completed and signed off.

Validity and Acceptance

Please read this Internship Offer Letter carefully. It sets out important terms and conditions governing your internship with Thaejus Aerodyne Research Pvt. Ltd. Kindly communicate your acceptance by return email and return a signed copy for the Company's records on or before joining. The hard copy, if required, may be provided in due course.

Your acceptance of this letter also confirms that you have read, understood and agree to comply with the Proprietary Information and Intellectual Property provisions, Code of Ethics and Business Conduct, cybersecurity requirements and applicable personal-data obligations stated above or separately issued by the Company.

Yours sincerely,

Capt. Raejus J. Job

CEO & Director – Flight Operations

Thaejus Aerodyne Research Pvt. Ltd.

Declaration and Acceptance

I, _____, accept the offer of engagement as Cybersecurity & Artificial Intelligence Intern – LMS Development with Thaejus Aerodyne Research Pvt. Ltd. for the six-month period stated in this letter. I confirm that I have read, understood and agree to comply with all terms and conditions of this Internship Offer Letter, including the Proprietary Information and Intellectual Property provisions, Code of Ethics and Business Conduct, cybersecurity and acceptable-use requirements, and personal-data obligations.

I understand that the internship is intended for supervised learning and project contribution, does not constitute permanent employment, and does not guarantee a future job, certification or placement.

Appendix – Joining Formalities

You are requested to report to the address communicated by the Company to complete the joining formalities for your internship.

Company: Thaejus Aerodyne Research Pvt. Ltd., Bengaluru, Karnataka, India

Reporting Manager: Mr. Tarun.S, Head of Training

At joining, please bring the originals for verification and submit one self-attested copy of each applicable document:

1. Educational documents: SSC/Class X; Class XII; graduation/postgraduation degree certificate and marks cards for all years/semesters; and relevant professional certifications.
2. Work-experience documents: certificates for organizations listed in your résumé, where applicable.
3. Three recent color passport-size photographs.
4. Identity proof: Passport, Driving License, PAN Card or Aadhaar Card, as accepted by the Company.
5. Any additional forms or declarations communicated by the Company, including confidentiality, information-security, intellectual-property and data-protection acknowledgements.

Only documents reasonably required for joining and lawful verification should be collected, used, retained and protected by authorized Company personnel.
