

SUYASH SHUKLA

Industry 4.0 oriented application engineering exposure focused on manufacturing systems and operational efficiency.

✉ suyash.shukla911@gmail.com

☎ +91-9044427043

CORE COMPETENCIES

Application Engineering Support
Industrial Automation & PLC Programming
Machine Commissioning & Testing
Predictive Maintenance Concepts
SAP BOM & Technical Documentation
Data-Driven Decision Making
AI / ML Application Development
IoT & Embedded Systems (ESP32)
Process Optimization
Exposure to basic B&R Automation, and
Flexi Soft safety systems
Customer-Focused Technical Solutions
Cross-Functional Coordination

SOFT SKILLS

System Thinking

Team Collaboration

Problem Solver

Adaptability

EDUCATION

- **2023 – 2026:** B.Sc. in Electronics & Computer Science, St Joseph's University, Bengaluru (CGPA: 6.8)
- **2023:** Class XII, BNSD Shiksha Niketan, Kanpur (87.2%)
- **2021:** Class X, BNSD Shiksha Niketan, Kanpur (74.6%)

TECHNICAL SKILLS

- **PROGRAMMING LANGUAGES:** Python, C, Java, SQL
- **Automation & Control:** PLC (Ladder Logic), Industrial Drives (Siemens, Mitsubishi, B&R), Sensors
- **AI & Data:** Machine Learning, NLP, Predictive Models, Power BI
- **Cloud Platforms:** AWS, Microsoft Azure, Google Cloud, Oracle Cloud
- **Embedded & IoT:** ESP32, IoT Architectures
- **Design & Tools:** EPLAN, Automation Studio, CATIA, AutoCAD, KiCAD
- **Cybersecurity (Foundational):** Wireshark, OWASP concepts
- **Safety & Systems Exposure:** Flexi Soft safety systems, machine commissioning support
- **Documentation & Process:** SAP BOM handling, technical documentation

PROFILE SUMMARY

- Engineering undergraduate with strong exposure to application engineering, industrial automation, and system-level problem solving.
- Hands-on experience in **PLC-based machine commissioning, industrial drives, sensors, and control panels** through on-site internship in a manufacturing environment.
- Worked extensively on **application support activities**, including system testing, troubleshooting, validation, and structured technical documentation.
- Experienced in **SAP BOM handling and workflow documentation**, supporting material tracking and process accuracy in industrial projects.
- Developed **AI/ML-based applications** such as predictive models, analytics dashboards, and NLP-based customer support chatbots with end-to-end implementation.
- Comfortable working across **hardware, software, and operations**, acting as a bridge between technical systems and practical use cases.
- Demonstrated ability to understand requirements, configure solutions, analyze issues, and communicate technical information clearly to stakeholders.
- Strong inclination towards **application-oriented roles** involving solution deployment, process improvement, and customer-focused technical support.
- Known for a **structured, disciplined, and systems-thinking approach**, supported by real-world internships, projects, and cross-functional coordination experience.

INTERNSHIP EXPERIENCE

Application & Automation Intern| Lohia Corp Limited, Bengaluru May'25 – June'25

- Supported **commissioning of lamination machine**, working on PLC-controlled industrial systems.
- Interpreted **EPLAN electrical schematics** and assisted in panel testing and troubleshooting activities.
- Worked with **Siemens, B&R, and Mitsubishi drives**, motors, and sensors during machine setup and validation.
- Handled **BOM documentation and material tracking using SAP and Excel**, ensuring accuracy and traceability.
- Prepared structured **machine documentation** for operational handover and future maintenance.
- Coordinated with **electrical, mechanical, and operations teams** while following safety protocols.

Machine Learning & Application Intern| Future Interns (Remote) Nov'25-Dec'25

- Developed **AI-based sales forecasting and churn prediction models** using Python.
- Designed **Power BI dashboards** for business analytics and decision support.
- Built an **NLP-based customer support chatbot** using Dialogflow, implementing intents, entities, and fallback logic.
- Delivered end-to-end application workflows with reports and demos.

Cybersecurity Intern| Redynox(Remote) Oct'25-Nov'25

- Performed **network and web security analysis**.
- Conducted vulnerability assessments including **SQL Injection, XSS, and CSRF**.
- **Analyzed network traffic using Wireshark and documented findings**.

CERTIFICATIONS

- AWS Generative AI Foundations
- Microsoft Azure & AI
- Google Cloud & Gemini AI
- Oracle AI Foundations & AI Agent Studio
- IBM Cloud Essentials
- Google Analytics Certification
- Forage Virtual Programs (Deloitte, Siemens, AWS)

Leadership & Activities

Editor: Jet Club, St Joseph’s University (2024)
Social Media Head: Jet Club, St Joseph’s University (2025)

ACHIEVEMENTS

First Prize – Digital Poster Making (2025)
First Prize – Reel Making (2023)
National Level Video Making – Lung Care Foundation
AIR 167 & 188 – Unstop Management Quizzes

PERSONAL DETAILS

Date of Birth: 28th February
Languages Known: English & Hindi (proficient), Kannada & German (beginner)
Address: Jalahalli, 560015, Bengaluru

PROJECTS

Lamination Machine – Application Support Project| Lohia Corp Limited, Bengaluru

- PLC-based commissioning, drive configuration, sensor integration, and troubleshooting.
- SAP BOM management and technical documentation.

StartupOps – Task & Location Tracking System| TechPreneuer| IIM Jammu

- Developed **AI-based sales forecasting and churn prediction models** using Python.
- Designed **Power BI dashboards** for business analytics and decision support.
- Built an **NLP-based customer support chatbot** using Dialogflow, implementing intents, entities, and fallback logic.
- Delivered end-to-end application workflows with reports and demos.

Fin-Clarity AI – FinTech Hackathon Project (FinSpark / FiNIT)

- AI system for analyzing financial products to identify risks and hidden charges
- Selected among **Top 10 teams** in first round

Predictive Maintenance & Service Scheduling System| EY Techathon6.0|

- AI system for analyzing financial products to identify risks and hidden charges
- Selected among **Top 10 teams** in first round

Autonomous Document Classifier & Discrepancy Detection System| GDG Gandhinagar – Autonomous Hacks 2026 (Online Hackathon)|

- AI Designed **an agentic AI workflow to summarize multiple documents**, compare content, and detect inconsistencies.
- Implemented multi-step reasoning to generate alignment scores with explanations for contradictory information.
- Shortlisted among **Top 40 teams** out of 700+ participants for offline finals at **GDG Gandhinagar**.
- Project built for Problem Statement 4 of the Autonomous Hacks challenge.
